

# reinventing space operations.

ADVANCED SYSTEMS | SMART OPERATIONS | AS A SERVICE

ENABLE is the world's first end-to-end cloud platform for space operations, allowing for easy, scalable and cost-efficient management of space assets. Featuring all the required capabilities to design, operate, scale and optimise your mission! Leveraging decades of experience in ground systems and operations, combined with modern IT technologies, ENABLE empowers your business throughout its whole lifecycle: from early feasibility studies, deployment of an in-orbit demonstrator, scaling the constellation up to full operational capabilities.

22

The true one-stop-shop for ground segment,  
everything you will need one click away.

### Fast track your first steps

With ENABLE you can get your mission ready in just a few clicks. The cloud platform is immediately available and easy to tailor: create your account and just pay for what you use!

### Make your case stronger for fundraising

With our pay-as-you-go model, shift CAPEX to OPEX and improve your cash flow. ENABLE's unique value propositions lower the risk and increase the credibility of your business in the eye of investors.

### Deliver a reliable service to your clients as you grow

Through ENABLE, gain control of your performance and increase your reliability so you can feel confident to meet your customers' SLAs.

### Simplify your processes

The single-source-of-truth stores your mission data in one place and feeds all platform functions, which eliminates interfaces, reduces errors and assures consistency. ENABLE also provides the collaborative and communication tools to boost your team's efficiency.

### Reduce operational costs

High automation and less complexity leads to lower costs. Pay only for the services you consume, with no additional costs once you stop using them.

### Adapt faster to a dynamic business environment

Explore the impact of business decisions on a real-time twin of your constellation. ENABLE allows you to modify your mission and the platform by yourself, without involving us.

>> Our vision is to facilitate the emergence of space ventures and empower them to run sustainable and profitable businesses. As a result, we will altogether better serve the Earth from space, utilise space resources and allow the expansion of humanity into the Solar System. <<
